

Course Write-Up (for Courses other than External Degree Programmes)

Key items	PEIs' Inputs												
Course Title: 1. If it is 100% e-learning course, add "(e-learning)" at the end of the course title. 2. If conducted in Mandarin, add "(Mandarin)" at the end of the title. 3. Include prefix "(MC)" for stackable certificate courses.	Advanced Certificate in AI Audit and Assurance												
Course Developer	☒ Self-developed ☐ Externally-developed ☐ Jointly-developed <i>(Curriculum self-developed by Tertiary Infotech.)</i>												
Qualification to be Awarded upon Course Completion <i>Note: The name of qualification to be awarded should be the same as the course title.</i>	Advanced Certificate in AI Audit and Assurance												
Qualification to be Awarded by:	Tertiary Infotech Academy												
Brief Description of Course (including learning objectives for each module)	Brief description of course and learning outcomes: The Advanced Certificate in AI Audit and Assurance equips professionals with the specialised skills to govern, assess and audit artificial intelligence and machine-learning systems. On completing the course, learners will be equipped to guide responsible AI governance, manage AI-related risk and privacy, oversee AI operations throughout the solution lifecycle, and plan and conduct audits of AI systems using AI-specific techniques. The course comprises three modules. Each module consists of 13 sessions (12 teaching + 1 assessment), conducted live online for 3 days a week, 7:00 PM – 10:00 PM (3 hours per session). The learning objective for each module is as follows: <table border="1"> <thead> <tr> <th>S/N</th><th>Module Title</th><th>Learning objective</th></tr> </thead> <tbody> <tr> <td>1</td><td>Module 1: AI Governance, Risk and Responsible AI</td><td>Learners will be able to advise stakeholders on implementing AI solutions that meet organisational strategic goals; evaluate AI models, considerations and requirements; establish AI governance and program management practices; manage AI risk; implement privacy and data governance programs; and apply leading practices, ethics, regulations and standards for responsible and ethical AI.</td></tr> <tr> <td>2</td><td>Module 2: AI Operations and Solution Lifecycle Management</td><td>Learners will be able to assess an organisation's AI risk profile and readiness; manage data, development methodologies and the AI solution lifecycle; govern change management and the supervision of AI outputs, impacts and decisions; apply testing techniques for AI solutions; and identify threats, vulnerabilities and incident response practices specific to AI.</td></tr> <tr> <td>3</td><td>Module 3: Auditing AI Systems – Tools and Techniques</td><td>Learners will be able to optimise audit outcomes for AI systems through innovation; plan and design AI audits; apply audit testing, sampling and evidence-collection techniques; assure audit data quality using data analytics; and produce effective AI audit outputs and reports.</td></tr> </tbody> </table>	S/N	Module Title	Learning objective	1	Module 1: AI Governance, Risk and Responsible AI	Learners will be able to advise stakeholders on implementing AI solutions that meet organisational strategic goals; evaluate AI models, considerations and requirements; establish AI governance and program management practices; manage AI risk; implement privacy and data governance programs; and apply leading practices, ethics, regulations and standards for responsible and ethical AI.	2	Module 2: AI Operations and Solution Lifecycle Management	Learners will be able to assess an organisation's AI risk profile and readiness; manage data, development methodologies and the AI solution lifecycle; govern change management and the supervision of AI outputs, impacts and decisions; apply testing techniques for AI solutions; and identify threats, vulnerabilities and incident response practices specific to AI.	3	Module 3: Auditing AI Systems – Tools and Techniques	Learners will be able to optimise audit outcomes for AI systems through innovation; plan and design AI audits; apply audit testing, sampling and evidence-collection techniques; assure audit data quality using data analytics; and produce effective AI audit outputs and reports.
S/N	Module Title	Learning objective											
1	Module 1: AI Governance, Risk and Responsible AI	Learners will be able to advise stakeholders on implementing AI solutions that meet organisational strategic goals; evaluate AI models, considerations and requirements; establish AI governance and program management practices; manage AI risk; implement privacy and data governance programs; and apply leading practices, ethics, regulations and standards for responsible and ethical AI.											
2	Module 2: AI Operations and Solution Lifecycle Management	Learners will be able to assess an organisation's AI risk profile and readiness; manage data, development methodologies and the AI solution lifecycle; govern change management and the supervision of AI outputs, impacts and decisions; apply testing techniques for AI solutions; and identify threats, vulnerabilities and incident response practices specific to AI.											
3	Module 3: Auditing AI Systems – Tools and Techniques	Learners will be able to optimise audit outcomes for AI systems through innovation; plan and design AI audits; apply audit testing, sampling and evidence-collection techniques; assure audit data quality using data analytics; and produce effective AI audit outputs and reports.											
Target Audience	Primary Target Audience - IT auditors, internal auditors and assurance professionals who want to specialise in auditing AI and machine-learning systems. - Risk, governance and compliance professionals responsible for AI oversight and AI regulatory requirements. - Cybersecurity and IT professionals moving into AI audit, assurance or governance roles. - Fresh graduates from accountancy, IT, computer science, data science or business												

	programmes seeking career-ready AI audit and assurance skills. • Mid-career professionals seeking a career switch into AI audit, AI assurance or AI governance roles. • Data and ML practitioners who need to understand audit, control and governance expectations for the systems they build. • Technical managers or team leads who need a strong AI audit and governance foundation to guide their teams or projects.																																
(For certificate and above qualifications only) – Potential Employment Opportunities upon Course Completion	Graduates of the Advanced Certificate in AI Audit and Assurance can pursue a range of roles in both the public and private sectors, including: • AI Auditor / AI Audit Specialist • AI Assurance Analyst • IT Auditor (AI-focused) • AI Governance, Risk & Compliance (GRC) Analyst • AI Risk & Assurance Specialist • Responsible AI / AI Compliance Officer • AI Governance Analyst • Internal Auditor (Technology / AI) • Data & AI Risk Analyst • Technology Risk Consultant These roles span industries such as finance, government, healthcare, technology and critical infrastructure, with opportunities for advancement into senior and managerial AI audit, assurance and governance positions.																																
Does the proposed course curriculum follow a foreign or international curriculum through full-time programme at the Primary, Secondary, and/or High School levels (grades 1-12), including self-developed curriculum?	☐ Yes ☒ No <i>If yes, please state the location of PEI's premise for the course to be conducted in: N/A</i>																																
Course Details	Mode of Delivery: ☐ Face-to-face ☐ Blended ☒ E-learning (100% synchronous live virtual classes) Duration: ~3.25 months (part-time) Class Frequency: 3 days per week x 3 hours per day (part-time), 7:00 PM – 10:00 PM Total Course Hours: 117 hours (part-time) Computation for course hours: 3 modules x 13 sessions x 3 hours = 117 hours. <table border="1"> <thead> <tr> <th>S/N</th><th>Course component</th><th>Number of Hours</th><th>Remarks</th></tr> </thead> <tbody> <tr> <td>1</td><td>Classroom Facilitation</td><td>N/A</td><td>Course is 100% e-learning (virtual)</td></tr> <tr> <td>2</td><td>Practicum</td><td>N/A</td><td></td></tr> <tr> <td>3</td><td>Practical</td><td>54</td><td>Hands-on labs in cloud sandbox / AI audit tooling / data analytics environments (delivered live online)</td></tr> <tr> <td>4</td><td>Synchronous e-learning</td><td>54</td><td>Live instructor-led virtual lectures & demonstrations</td></tr> <tr> <td>5</td><td>Asynchronous e-learning</td><td>N/A</td><td></td></tr> <tr> <td>6</td><td>Assessment</td><td>9</td><td>3-hour assessment after each of the 3 modules</td></tr> <tr> <td></td><td>Total Duration (in hours)</td><td>117</td><td>39 sessions x 3 hours (36 teaching + 3 assessment)</td></tr> </tbody> </table>	S/N	Course component	Number of Hours	Remarks	1	Classroom Facilitation	N/A	Course is 100% e-learning (virtual)	2	Practicum	N/A		3	Practical	54	Hands-on labs in cloud sandbox / AI audit tooling / data analytics environments (delivered live online)	4	Synchronous e-learning	54	Live instructor-led virtual lectures & demonstrations	5	Asynchronous e-learning	N/A		6	Assessment	9	3-hour assessment after each of the 3 modules		Total Duration (in hours)	117	39 sessions x 3 hours (36 teaching + 3 assessment)
S/N	Course component	Number of Hours	Remarks																														
1	Classroom Facilitation	N/A	Course is 100% e-learning (virtual)																														
2	Practicum	N/A																															
3	Practical	54	Hands-on labs in cloud sandbox / AI audit tooling / data analytics environments (delivered live online)																														
4	Synchronous e-learning	54	Live instructor-led virtual lectures & demonstrations																														
5	Asynchronous e-learning	N/A																															
6	Assessment	9	3-hour assessment after each of the 3 modules																														
	Total Duration (in hours)	117	39 sessions x 3 hours (36 teaching + 3 assessment)																														
Minimum Entry Requirements	Age: At least 21 years old Academic: At least C6 at GCE O-Level in any 3 subjects, or equivalent; or Mature candidate who is at least 25 years old with at least 4 years of working experience																																
(For certificate qualifications only) – to be read in conjunction with SSG Advisory 3/2022	Will the PEI issue modular certificate(s) that students can stack towards the award of the Certificate Qualification? ☒ YES ☐ NO Note: Only “Terminal” Certificate Courses can be registered as Modular Courses																																

	that stack to a Certificate Qualification. Maximum time allowed to complete the modular courses for award of the certificate qualification: ~3.25 months (part-time). Terms and conditions to be met to be awarded the Certificate: To be awarded the certificate, participants must: Achieve a pass in all required assessments (one per module), and Maintain a minimum attendance of 75% throughout the course. <table border="1"> <thead> <tr> <th>S/N</th><th>Title of certificate qualification</th><th>Modules</th></tr> </thead> <tbody> <tr> <td>1.</td><td>Advanced Certificate in AI Audit and Assurance</td><td> 1. AI Governance, Risk and Responsible AI 2. AI Operations and Solution Lifecycle Management 3. Articulation Pathway	Is the proposed course a pathway programme? ☐ YES ☒ NO						
Information on External Course Developer <i>(for externally developed courses only)</i>	Not applicable — the course is self-developed by Tertiary Infotech Academy.						
Course Accreditation	Is the proposed course accredited by any external organisation? ☐ YES ☒ NO						
Association, Collaboration or Affiliation	Is there any other form of association, collaboration or affiliation with any other organisation or persons, either local or foreign, in respect of this course? ☐ YES ☒ NO						
Courses with Industrial Attachment	Does the proposed course have industrial attachment? ☐ YES ☒ NO						
Other Information, if applicable	N.A.						

I, **Dr. ANG CHEW HOE**, (NRIC/Passport no. S1808997A) manager of **TERTIARY INFOTECH ACADEMY PTE. LTD.** declare that:

- (a) the course has been approved by the Academic Board;
- (b) the Academic Board has approved the deployment of teachers for the course in accordance with Regulation 26 of Private Education Regulations;
- (c) the assessment methods and procedures for the course have been approved by the Examination Board; and
- (d) all information provided in this application is true and accurate to my knowledge.
