

Course Write-Up (for Courses other than External Degree Programmes)

Key items	PEIs' Inputs												
Course Title: 1. If it is 100% e-learning course, add "(e-learning)" at the end of the course title. 2. If conducted in Mandarin, add "(Mandarin)" at the end of the title. 3. Include prefix "(MC)" for stackable certificate courses.	Advanced Certificate in AI Security and Governance Management												
Course Developer	☒ Self-developed ☐ Externally-developed ☐ Jointly-developed <i>(Curriculum self-developed by Tertiary Infotech.)</i>												
Qualification to be Awarded upon Course Completion <i>Note: The name of qualification to be awarded should be the same as the course title.</i>	Advanced Certificate in AI Security and Governance Management												
Qualification to be Awarded by:	Tertiary Infotech Academy												
Brief Description of Course (including learning objectives for each module)	Brief description of course and learning outcomes: The Advanced Certificate in AI Security and Governance Management equips professionals with the specialised skills to govern, manage and secure artificial intelligence and machine-learning systems across the enterprise. By the end of the programme, learners will be equipped to build and lead AI security governance and programmes, evaluate and mitigate AI-related risks, threats, vulnerabilities and supply chain exposures, and architect, implement and monitor security controls purpose-built for AI systems. The course comprises three modules. Each module consists of 13 sessions (12 teaching + 1 assessment), conducted live online for 3 days a week, 7:00 PM – 10:00 PM (3 hours per session). The learning objective for each module is as follows: <table border="1"> <thead> <tr> <th>S/N</th><th>Module Title</th><th>Learning objective</th></tr> </thead> <tbody> <tr> <td>1</td><td>Module 1: AI Governance, Policy and Program Leadership</td><td>Learners will be able to advise stakeholders on implementing AI security solutions through effective policy, data governance, program management and incident response; address stakeholder considerations, industry frameworks and regulatory requirements; develop AI-related strategies, policies and procedures; manage the AI asset and data life cycle; build and manage an AI security program; and establish business continuity and incident response.</td></tr> <tr> <td>2</td><td>Module 2: Managing AI Risks, Threats and Supply Chains</td><td>Learners will be able to assess and manage risks, threats, vulnerabilities and supply chain issues related to enterprise-wide AI adoption, including AI risk assessment, thresholds and treatment; AI threat and vulnerability management; and AI vendor and supply chain management.</td></tr> <tr> <td>3</td><td>Module 3: AI Security Architecture, Controls and Monitoring</td><td>Learners will be able to apply security technologies, techniques and controls tailored to AI systems, including AI security architecture and design; the AI life cycle (model selection, training and validation); data management controls; privacy, ethical, trust and safety controls; and security controls and monitoring.</td></tr> </tbody> </table>	S/N	Module Title	Learning objective	1	Module 1: AI Governance, Policy and Program Leadership	Learners will be able to advise stakeholders on implementing AI security solutions through effective policy, data governance, program management and incident response; address stakeholder considerations, industry frameworks and regulatory requirements; develop AI-related strategies, policies and procedures; manage the AI asset and data life cycle; build and manage an AI security program; and establish business continuity and incident response.	2	Module 2: Managing AI Risks, Threats and Supply Chains	Learners will be able to assess and manage risks, threats, vulnerabilities and supply chain issues related to enterprise-wide AI adoption, including AI risk assessment, thresholds and treatment; AI threat and vulnerability management; and AI vendor and supply chain management.	3	Module 3: AI Security Architecture, Controls and Monitoring	Learners will be able to apply security technologies, techniques and controls tailored to AI systems, including AI security architecture and design; the AI life cycle (model selection, training and validation); data management controls; privacy, ethical, trust and safety controls; and security controls and monitoring.
S/N	Module Title	Learning objective											
1	Module 1: AI Governance, Policy and Program Leadership	Learners will be able to advise stakeholders on implementing AI security solutions through effective policy, data governance, program management and incident response; address stakeholder considerations, industry frameworks and regulatory requirements; develop AI-related strategies, policies and procedures; manage the AI asset and data life cycle; build and manage an AI security program; and establish business continuity and incident response.											
2	Module 2: Managing AI Risks, Threats and Supply Chains	Learners will be able to assess and manage risks, threats, vulnerabilities and supply chain issues related to enterprise-wide AI adoption, including AI risk assessment, thresholds and treatment; AI threat and vulnerability management; and AI vendor and supply chain management.											
3	Module 3: AI Security Architecture, Controls and Monitoring	Learners will be able to apply security technologies, techniques and controls tailored to AI systems, including AI security architecture and design; the AI life cycle (model selection, training and validation); data management controls; privacy, ethical, trust and safety controls; and security controls and monitoring.											
Target Audience	Primary Target Audience • Cybersecurity and information security professionals who want to specialise in securing and governing AI and machine-learning systems. • Security managers, CISOs and security architects responsible for enterprise-wide AI security programs. • IT, risk, governance and compliance professionals responsible for AI oversight, controls and regulatory compliance.												

	• Fresh graduates from IT, computer science, data science, cybersecurity or business programmes seeking career-ready AI security management skills. • Mid-career professionals seeking a career switch into AI security management, AI governance or AI risk roles. • Data and ML practitioners who need to understand security, control and governance expectations for the systems they build. • Technical managers or team leads who need a strong AI security and governance foundation to guide their teams or projects.																																
(For certificate and above qualifications only) – Potential Employment Opportunities upon Course Completion	Graduates of the Advanced Certificate in AI Security and Governance Management can pursue a range of roles in both the public and private sectors, including: • AI Security Manager • AI Security Architect • AI Governance, Risk & Compliance (GRC) Analyst • AI Risk & Assurance Specialist • AI Security Program Manager • Information Security Manager (AI-focused) • Responsible AI / AI Compliance Officer • AI Security Analyst / Engineer • Technology Risk & Controls Analyst • Cybersecurity Manager / Lead These roles span industries such as finance, government, healthcare, technology and critical infrastructure, with opportunities for advancement into senior and managerial AI security and governance positions.																																
Does the proposed course curriculum follow a foreign or international curriculum through full-time programme at the Primary, Secondary, and/or High School levels (grades 1-12), including self-developed curriculum?	☐ Yes ☒ No <i>If yes, please state the location of PEI's premise for the course to be conducted in: N/A</i>																																
Course Details	Mode of Delivery: ☐ Face-to-face ☐ Blended ☒ E-learning (100% synchronous live virtual classes) Duration: ~3.25 months (part-time) Class Frequency: 3 days per week x 3 hours per day (part-time), 7:00 PM – 10:00 PM Total Course Hours: 117 hours (part-time) Computation for course hours: 3 modules x 13 sessions x 3 hours = 117 hours. <table><tr><th>S/N</th><th>Course component</th><th>Number of Hours</th><th>Remarks</th></tr><tr><td>1</td><td>Classroom Facilitation</td><td>N/A</td><td>Course is 100% e-learning (virtual)</td></tr><tr><td>2</td><td>Practicum</td><td>N/A</td><td></td></tr><tr><td>3</td><td>Practical</td><td>54</td><td>Hands-on labs in cloud sandbox / AI security & governance tooling / data analytics environments (delivered live online)</td></tr><tr><td>4</td><td>Synchronous e-learning</td><td>54</td><td>Live instructor-led virtual lectures & demonstrations</td></tr><tr><td>5</td><td>Asynchronous e-learning</td><td>N/A</td><td></td></tr><tr><td>6</td><td>Assessment</td><td>9</td><td>3-hour assessment after each of the 3 modules</td></tr><tr><td></td><td>Total Duration (in hours)</td><td>117</td><td>39 sessions x 3 hours (36 teaching + 3 assessment)</td></tr></table>	S/N	Course component	Number of Hours	Remarks	1	Classroom Facilitation	N/A	Course is 100% e-learning (virtual)	2	Practicum	N/A		3	Practical	54	Hands-on labs in cloud sandbox / AI security & governance tooling / data analytics environments (delivered live online)	4	Synchronous e-learning	54	Live instructor-led virtual lectures & demonstrations	5	Asynchronous e-learning	N/A		6	Assessment	9	3-hour assessment after each of the 3 modules		Total Duration (in hours)	117	39 sessions x 3 hours (36 teaching + 3 assessment)
S/N	Course component	Number of Hours	Remarks																														
1	Classroom Facilitation	N/A	Course is 100% e-learning (virtual)																														
2	Practicum	N/A																															
3	Practical	54	Hands-on labs in cloud sandbox / AI security & governance tooling / data analytics environments (delivered live online)																														
4	Synchronous e-learning	54	Live instructor-led virtual lectures & demonstrations																														
5	Asynchronous e-learning	N/A																															
6	Assessment	9	3-hour assessment after each of the 3 modules																														
	Total Duration (in hours)	117	39 sessions x 3 hours (36 teaching + 3 assessment)																														
Minimum Entry Requirements	Age: At least 21 years old Academic: At least C6 at GCE O-Level in any 3 subjects, or equivalent; or Mature candidate who is at least 25 years old with at least 4 years of working experience																																
(For certificate qualifications only) – to be read in conjunction with SSG Advisory 3/2022	Will the PEI issue modular certificate(s) that students can stack towards the award of the Certificate Qualification?																																

	✓ YES ☐ NO Note: Only “Terminal” Certificate Courses can be registered as Modular Courses that stack to a Certificate Qualification. Maximum time allowed to complete the modular courses for award of the certificate qualification: ~3.25 months (part-time). Terms and conditions to be met to be awarded the Certificate: To be awarded the certificate, participants must: Achieve a pass in all required assessments (one per module), and Maintain a minimum attendance of 75% throughout the course. <table border="1"> <thead> <tr> <th>S/N</th><th>Title of certificate qualification</th><th>Modules</th></tr> </thead> <tbody> <tr> <td>1.</td><td>Advanced Certificate in AI Security and Governance Management</td><td> 1. AI Governance, Policy and Program Leadership 2. Managing AI Risks, Threats and Supply Chains 3. AI Security Architecture, Controls and Monitoring </td></tr> </tbody> </table>	S/N	Title of certificate qualification	Modules	1.	Advanced Certificate in AI Security and Governance Management	1. AI Governance, Policy and Program Leadership 2. Managing AI Risks, Threats and Supply Chains 3. AI Security Architecture, Controls and Monitoring
S/N	Title of certificate qualification	Modules					
1.	Advanced Certificate in AI Security and Governance Management	1. AI Governance, Policy and Program Leadership 2. Managing AI Risks, Threats and Supply Chains 3. AI Security Architecture, Controls and Monitoring					
Articulation Pathway	Is the proposed course a pathway programme? ☐ YES ✓ NO						
Information on External Course Developer <i>(for externally developed courses only)</i>	Not applicable — the course is self-developed by Tertiary Infotech Academy.						
Course Accreditation	Is the proposed course accredited by any external organisation? ☐ YES ✓ NO						
Association, Collaboration or Affiliation	Is there any other form of association, collaboration or affiliation with any other organisation or persons, either local or foreign, in respect of this course? ☐ YES ✓ NO						
Courses with Industrial Attachment	Does the proposed course have industrial attachment? ☐ YES ✓ NO						
Other Information, if applicable	N.A.						

I, **Dr. ANG CHEW HOE**, (NRIC/Passport no. S1808997A) manager of **TERTIARY INFOTECH ACADEMY PTE. LTD.** declare that:

- (a) the course has been approved by the Academic Board;
- (b) the Academic Board has approved the deployment of teachers for the course in accordance with Regulation 26 of Private Education Regulations;
- (c) the assessment methods and procedures for the course have been approved by the Examination Board; and
- (d) all information provided in this application is true and accurate to my knowledge.
