

Course Write-Up (for Courses other than External Degree Programmes)

Version 4.0

Key items	PEIs' Inputs
Course Title: 1. If it is 100% e-learning course, to add "(e-learning)" at the end of the course title. 2. If the course is conducted in Mandarin, to add "(Mandarin)" at the end of the course title. 3. Include prefix "(MC)" for stackable certificate courses.	Advanced Certificate in Enterprise Information Security Leadership
Course Developer	☒ Self-developed ☐ Externally-developed ☐ Jointly-developed
Qualification to be Awarded upon Course Completion <i>Note: The name of qualification to be awarded should be the same as the course title.</i>	Advanced Certificate in Enterprise Information Security Leadership
Qualification to be Awarded by:	Tertiary Infotech Academy Pte Ltd

Brief Description of Course (including learning objectives for each module)

This Advanced Certificate develops enterprise-level competency in governing, designing, validating and operating secure information systems. Each of the 5 modules consists of 10 sessions (9 teaching + 1 assessment), conducted live online for 3 sessions per week, 7:00 PM - 10:00 PM (3 hours per session). The full course comprises 50 live online sessions and 150 total course hours.

Upon successful completion, learners will demonstrate the ability to govern information security and risk while protecting information assets; design secure architecture, cryptographic controls and protected network communications; manage digital identity, access control and security assurance activities; coordinate cyber defence operations, incident response, continuity and recovery; and embed secure development, software supply chain and application security practices into delivery workflows.

Please provide the information on module and its learning objective in the following format:

S/N	Module Title	Learning objective
1	Module 1: Enterprise Security Governance, Risk and Information Asset Protection	Learners will be able to apply professional ethics, governance structures, policy frameworks and accountability models; analyse legal, privacy, compliance, investigation and third-party risk considerations; identify information assets, owners, custodians and usage requirements; and apply classification, handling, retention, disposal and lifecycle protection practices.
2	Module 2: Secure Architecture, Engineering, Cryptography and Communications	Learners will be able to apply secure design principles such as least privilege, defence in depth, secure defaults and zero-trust thinking; evaluate system, cloud, container, embedded, IoT and virtualisation risks; select suitable cryptographic and lifecycle controls; and recommend secure network, protocol, segmentation, wireless/mobile, cloud networking and remote-access designs.
3	Module 3: Digital Identity, Access Control and Security Assurance	Learners will be able to design identification, authentication, federation, credential, single sign-on and access lifecycle controls across information, systems, devices, facilities, applications and services; plan internal, external and third-party assessment, testing and audit strategies; and analyse validation evidence to report remediation priorities.
4	Module 4: Cyber Defence Operations, Incident Response and Resilience	Learners will be able to support investigations, evidence handling, monitoring, threat intelligence and SIEM/IDPS operations; apply configuration, patch, vulnerability, incident, change and resource protection practices; and coordinate recovery, continuity and safety activities.
5	Module 5: Secure Software Lifecycle, DevSecOps and Application Protection	Learners will be able to integrate security into development methodologies, DevOps/DevSecOps and operational maintenance; assess development ecosystems, CI/CD pipelines, repositories and application testing; and evaluate acquired

		software, open-source components and secure coding standards.

Target Audience	Primary Target Audience • IT, cybersecurity, risk and governance professionals who want to broaden from technical security work into enterprise-level information security leadership. • Security analysts, security engineers, system/network administrators, application security practitioners and IT managers seeking structured coverage of governance, architecture, operations, assurance and software security. • Fresh graduates from IT, computer science, cybersecurity, data science or engineering programmes who want a career-ready foundation in enterprise security practice. • Mid-career professionals seeking to transition into information security, cyber risk, security assurance or security management roles. Learner Profile Learners should be comfortable with basic IT concepts, operating systems, networking and common business technology environments. Prior cybersecurity exposure is helpful but not mandatory.																																
(For certificate and above qualifications only) – Potential Employment Opportunities upon Course Completion	Graduates of the Advanced Certificate in Enterprise Information Security Leadership can pursue a wide range of roles in both the public and private sectors, including: • Information Security Analyst • Cybersecurity Analyst / Engineer • Security Governance, Risk and Compliance (GRC) Analyst • Security Assurance Analyst • Cyber Defence Monitoring Analyst • Incident Response Analyst • Vulnerability Management Analyst • Identity and Access Control Analyst • Network Security Analyst • Application Security Analyst • Cyber Risk Analyst • Information Security Consultant • Assistant Information Security Manager																																
Does the proposed course curriculum follow a foreign or international curriculum through full-time programme at the Primary, Secondary, and/or High School levels (i.e., grades 1-12) including self-developed curriculum?	☐ Yes ☒ No If yes, please state the location of PEI's premise for the course to be conducted in:																																
Course Details • Mode of Delivery • Duration • Class Frequency • Total Course Hours	☐ Face-to-face ☐ Blended ☒ E-learning (100% live synchronous virtual) Duration: approx. 3.9 months / 16.7 weeks (part-time) Class Frequency: 3 sessions per week (Mon, Wed, Fri), 7:00 PM - 10:00 PM (3 hours per session) Total Course Hours: 150 hours (part-time)																																
Course Hours Computation	Please provide the computation for course hours below (N/A if not applicable): <table border="1" data-bbox="613 1444 1497 1976"> <thead> <tr> <th>S/N</th><th>Course component</th><th>Number of Hours</th><th>Remarks</th></tr> </thead> <tbody> <tr> <td>1</td><td>Classroom Facilitation</td><td>NA</td><td>100% virtual delivery</td></tr> <tr> <td>2</td><td>Practicum</td><td>NA</td><td></td></tr> <tr> <td>3</td><td>Practical</td><td>NA</td><td>Applied practice is embedded in live online teaching sessions</td></tr> <tr> <td>4</td><td>Synchronous e-learning</td><td>135</td><td>Live online teaching and applied exercises (5 modules x 9 teaching sessions x 3 hrs)</td></tr> <tr> <td>5</td><td>Asynchronous e-learning</td><td>NA</td><td>Optional self-study, not counted</td></tr> <tr> <td>6</td><td>Assessment</td><td>15</td><td>Live online module assessments (5 modules x 1 assessment session x 3 hrs)</td></tr> <tr> <td>Total Duration (in</td><td>Total Duration (in hours)</td><td>Total Duration (in hours)</td><td>150</td></tr> </tbody> </table>	S/N	Course component	Number of Hours	Remarks	1	Classroom Facilitation	NA	100% virtual delivery	2	Practicum	NA		3	Practical	NA	Applied practice is embedded in live online teaching sessions	4	Synchronous e-learning	135	Live online teaching and applied exercises (5 modules x 9 teaching sessions x 3 hrs)	5	Asynchronous e-learning	NA	Optional self-study, not counted	6	Assessment	15	Live online module assessments (5 modules x 1 assessment session x 3 hrs)	Total Duration (in	Total Duration (in hours)	Total Duration (in hours)	150

1.	Advanced Certificate in Enterprise Information Security Leadership	1. Enterprise Security Governance, Risk and Information Asset Protection 2. Secure Architecture, Engineering, Cryptography and Communications 3. Digital Identity, Access Control and Security Assurance 4. Cyber Defence Operations, Incident Response and Resilience 5. Secure Software Lifecycle, DevSecOps and Application Protection								
	• The maximum amount of time allowed to complete the course to be awarded the certificate qualification(s): approx. 3.9 months / 16.7 weeks (part-time) • The terms and conditions to be met so as to be awarded the Certificate: To be awarded the certificate, participants must: - Achieve at least 75% attendance; - Complete all required module assignments, practical exercises and assessments; - Pass the required assessments; and - Settle all outstanding course fees, where applicable.									
Articulation Pathway	Is the proposed course a pathway programme? ☐ YES ☒ NO If yes, please furnish the supporting documents.									
Information on External Course Developer (for externally developed courses only)	Not applicable - the course is self-developed by Tertiary Infotech Academy.									
Other Information, if applicable	N.A.									
Course Accreditation	Is the proposed course accredited by any external organisation? ☐ YES ☒ NO									
Association, Collaboration or Affiliation	Is there any other form of association, collaboration or affiliation with any other organisation or persons, either local or foreign, in respect of this course? ☐ YES ☒ NO									
Courses with Industrial Attachment	Does the proposed course have industrial attachment? ☐ YES ☒ NO									

Declaration

I, **Dr. ANG CHEW HOE**, (NRIC/Passport no. S1808997A) manager of **TERTIARY INFOTECH ACADEMY PTE. LTD.** declare that:

- (a) the course has been approved by the Academic Board;
- (b) the Academic Board has approved the deployment of teachers for the course in accordance with Regulation 26 of Private Education Regulations;
- (c) the assessment methods and procedures for the course has been approved by the Examination Board; and
- (d) all information provided in this application is true and accurate to my knowledge.

Alfred Ang
